Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

(Original) A remote control bobber comprising:
a housing that is buoyant in water;

a motor mounted within the housing having a shaft that extends through the housing;

a propeller mounted on the shaft outside the housing;

a receiver mounted within the housing, the receiver including an antenna and a control circuit to control the motor; and

a power supply connected to the motor and the receiver.

- 2. (Original) The remote control bobber of claim 1 wherein the housing includes a mounting structure capable of attachment to a line.
- 3. (Original) The remote control bobber of claim 1 wherein a second motor is mounted within the housing having a second shaft that extends through he housing and a second propeller is mounted on the second shaft.
- 4. (Original) The remote control bobber of claim 1 wherein a transmitter activated by a user controls the receiver.
- 5. (Original) The remote control bobber of claim 3 wherein the motors are separately controllable.

6. (Original) The remote control bobber of claim 1 wherein the housing has a rudder that is controlled by a servo contained within the housing.

Appl.No. 10/717,324 Amdt. dated May 4, 2004 Reply to O.A. of April 20, 2004

- 7. (Original) The remote control bobber of claim 1 wherein the housing is spherical.
- 8. (New) The remote control bobber of claim 1 wherein the housing has a window and wherein a camera having a lens is mounted within the housing such that the lens is directed towards the window.
- 9. (New) The remote control bobber of claim 1 wherein the housing includes a channel passing through the housing and wherein the motors are mounted within the channel.
- 10. (New) The remote control bobber of claim 9 wherein a rudder is mounted within the channel.
